Biographical Information:

The city of Telos is governed by 12 Ascended Masters and Adama is the High Priest. Telos is a city of highly evolved people who are descendents of the Lemurians. Adama himself was a Lemurian, being thousands of years old now. He came from Lemuria with his people 12,000 years ago.

Adama is somewhat taller than we are, broader and stronger. He exercises daily by jogging and keeps his mind young with positive thoughts.

Adama says he was mated but she's since passed on. He says he also has children who of course are quite adult now. A girl and a boy. They live in Telos as well. He says he has a new mate and when I commented that their lives aren't dissimilar to ours in that respect, he said they're beings of love and like to express it in any way possible.

He doesn't appreciate me prying into his personal life. LOL He says he's very private.
