

ET Profile

Name: Bee-lay-ga-T
Race: Arcturian
Home Planet /Star: Arcturus
Dimension: 5th
Distance from Earth: 37 light years
Calling: GFL Mothership Commander
Service to Earth: liberate planet Earth from the dark
Earth Incarnations: none

Biographical Information:

Me: Commander Bee-lay-ga-T, so you did some healing work on Christine Dennett when she portrayed you?
 CB: Yes, how are you? I did because I felt she would portray better when she was more in balance with the energies she is perceiving.
 Me: Ah I see. Arguably, you'll do anything better when balanced, wouldn't you?
 CB: Yes. We are all attempting to achieve homeostasis in the body and the mind. Our universe is an experiment in balancing of all its component energies.
 Me: That means earthlings. LOL
 CB: You are most powerful beings. Unfortunately at the moment you might be described as "unplugged" from your energy source. Your DNA is in need of some evolving and this is happening. What can you do with a body that only functions with 30% of its inherent ability? Not much, I would say.
 Me: True. You're quite the healer.
 CB: Arcturians make a practice of it. We enjoy excelling.
 Me: Even here, you've got a good reputation.
 CB: Thank you.
 Me: So Ysterplaat base, how is that going?
 CB: We're still reconditioning it. The above ground facilities have no awareness and continue about their daily routine. Below ground is a different story. We have stemmed much of the hostage transport off this planet that was occurring in South Africa. This was a key base to take. There are smaller bases but the Federation can arrest activity there by themselves.
 Me: Okay, I wasn't looking for work. I have plenty.
 CB: Yes, and your team.
 Me: Always ready and willing to go. They're not my team; we are a team. There's no leader. We all contribute.
 CB: Ah! Very wise indeed.
 Me: I try. There's such an abuse of power going on on this planet and I don't try to look like one of those abusers. I like to think I'm working with mature people who can shoulder their part. And they do.
 CB: Yes, a good team indeed!
 Me: We all validate each other's perceptions so it works out really well. So, as for you personally, Christine said she saw a woman and a younger man with you.
 CB: Ah yes! My mate Friega-T and my son Baltzik.

IMPLANT COMMUNICATIONS

Bee-lay-ga-T

Me: What does the T stand for?

CB: It is simply another sound.

Me: Oh. We're not used to one letter words in English. We don't have that many.

CB: It is based on our frequency. When you listen to the frequency, you hear these sounds. The T that I share with my mate is soul-based as we are from the same soul.

Me: That makes sense. I wonder if me and Ivo have a similar sound.

CB: Oh, you would indeed!

Me: So I teased you before about not being in the Arcturian fleet. Why did you choose the Galactic Federation to work for?

CB: Aha. Because I would ascend to commandership more quickly. I am what we call an organizer. I have what you would call leadership capabilities and I organize people well.

Me: Okay.

CB: The Federation was also looking for our people so I applied. I have been working with them for about 800 of your years. That's not a long time in an Arcturian lifetime.

Me: So your family is with you all the time?

CB: No, they go back and forth to Arcturus. We have shuttles that pick up our people and relay them back home.

Me: Like a plane flight?

CB: Accessing. Yes, something like that you have on earth.

Me: Can I ask how tall you are?

CB: Certainly! I am approximately 3 feet of your height (approx. 1 metre). It is interesting that your entire planet functions on different rules of measurement. This is disharmonic.

Me: Yes, especially when things happen like in the 80's when Canada switched to metric, a plane was fuelled up with insufficient fuel to fly across the ocean. It turned into a big glider. Fortunately it was a good captain.

CB: I see. Well, it would be worthwhile for your people to decide on a common measurement system for all.

Me: It would be. Maybe one day when we drop all our borders and other nonsense and just become one world. Maybe the Agarthans will have a system they'd like to share with us.

CB: Interesting. A small thing like measuring sets you apart from another. I must study this.

Me: Well, you've come to the right place, Commander! Enjoy yourself.

CB: You are a curious species. In your infancy but just wait.

Me: Thank you for this conversation and allowing your portrait to be done.

CB: Oh, you are most welcome.
