

Martian "Firkon"  
as named by George Adamski

October 9, 2021

Having had a preliminary conversation with Martian Firkon, as named by George Adamski in the 1950's, Firkon has offered to answer some questions for us on the subject of ETs who live on earth, what are they doing here, why are they here, how are they helping us.

Originally he had a partner in Ramu, a Saturnian who has gone back to Saturn to live, and when I ask if he has a new partner in his work as a "Contact Man" he states that he does.

My suspicion with many of these ETs is that they are part of either the Alliance or the Resistance, or perhaps yet some other extraterrestrial/human group that is helping us in this world to move out of darkness. I have an idea of a few members of the Alliance and have spoken already to one who is currently active (see our website) but I feel there are many more.

So let's talk to him now to see what he has to tell us about himself and his work here on earth.

Me: Hi, Firkon?

Firkon: Hello Sharon. It's good to speak to you again!

Me: Likewise! The people loved your picture and I thank you for helping me with that.

Firkon: Oh, you're quite welcome. (He's a bit shy, a bit bashful about it.)

Me: So, you're in New York still, I'm assuming.

Firkon: Well, I'm moving all over, actually. This is a prime time for my network to be active and we're on notice constantly to be on the move. The other thing is, we don't really stay in one place for too long – that's just the nature of our work.

Me: Yes, I guess for safety's sake, but you have telepathic skills that will help you to stay safe, right?

Firkon: Of course. I can read anybody's mind. I'm also watched by Venusian computers on board their ships and they notify me if someone is becoming suspicious about my activities. Then I take remedial action. Sometimes that does involve moving or disappearing, other times it involves creating an explanation for my activities.

Me: Do you find you have to lie to do this work?

Firkon: We try not to. We know that it doesn't help keep our frequency up. To lie is lose our telepathic abilities. Well, you know that.

Me: I know. I used to go back and forth between telepathic and not telepathic, able to read minds, not able to read minds, as either I desired because I don't like reading minds here on earth, but also it depended on where I was personally in frequency.

Firkon: So you understand.

Me: Yes, I had times of higher energy and lower energy. And what lowers your energy? Lying does. But I'm more interested in your remaining safe, and if you can explain how you do that?

Firkon: Thank you, we have a network of people who are telepaths as well as privy to all information available on earth including the thoughts of all upon earth so we can detect when we are being thought of, and of course, that's why I'm here now.

Me: Yes. All I have to do is say the name of the person or think of them and the line's open. With telepathy

Martian "Firkon"  
as named by George Adamski

there is no privacy, and I prefer it that way.

Firkon: Yes, absolutely. As for how I stay safe, these are strong safeguards. We also drive vehicles that are not readily traced.

Me: So police can't look up your details if they pull you over?

Firkon: We don't get pulled over, but if they ran our plates they would get an alias. We have a lot of them as well.

Me: Ah. I see. Makes sense. An alien with an alias, handy!

Firkon: LOL We have many profiles and we know which one is safest to work when we come in contact with authorities on the planet.

Me: As for the work that you do, are you employed right now?

Firkon: Yes, I do consultant work.

Me: So you're self employed?

Firkon: If you want to call it that. I'm on many payrolls.

Me: Are you sure it's safe to divulge this information to us?

Firkon: Yes, these companies are well aware of what's going on, how they're being cracked down on, and who turned them in. They're just not telling you that.

Me: So you could turn them in then?

Firkon: I could, and as I am who I am I am a very trustworthy source of intel.

Me: Even moreso than an earthling, who might be in it for their own purposes... I see.

Firkon: We're often sent to particular companies in order to infiltrate their operations. We go to parties or other elitist events in order to speak to the "big boys". Alcohol is a wonderful truth serum. LOL

Me: LOL I know. I spoke the most truth when I used to get drunk. That's the other thing: these corporate egotists would be very flattered in a stranger who shows interest in them, never mind admires them... they'd keep spilling the beans the more you schmooze them. That's interesting.

Firkon: Many of the things you see in the movies are things that we do. You're thinking of a James Bond movie and he had gotten into a party in the Alps. We go to casinos, we know how to gamble. We know how to target certain people and how to get their attention.

Me: Super spies! Interesting!

Firkon: This is why we're here "boots on the ground" as you call it. Because we interact with them in the way they would with other members of the public.

Me: So you spend time in Las Vegas, then?

Firkon: Very much so. I'm a black jack expert. I have won a lot of money at the tables, in fact. Of course, I can read the minds of all around the table, including the dealer. LOL So I know which cards to play.

Me: Poor you. I would never go there, except maybe to hit the desert and look for ships.

Firkon: There's a reason so many of them are out there as well, and that is part of the reason, but yes, the underground DUMBs are there too. There's much activity in that area but also Las Vegas is a recreational center for ETs in the area. You know that Area 51 had a large extraterrestrial hotel and they had casino's in them as well, but they like to go above to the surface to see. Gambling attracts them because crooks enjoy the risk factors.

Me: Yes, dare, double dare.

So you're doing all this spy and espionage work with the advantage of being a telepathic extraterrestrial.

Firkon: Yes.

Martian "Firkon"  
as named by George Adamski

Me: I saw a scenario of people working at one of the vaxx businesses where a shipment of vaxx was replaced with a shipment of placebo.

Firkon: Yes, we've done that. We try to do as little as possible to change the outcome of certain events, but they catch on to us, as well. By then we're in the wind. Few of us have been caught doing this work. If we're caught we automatically are terminated.

Me: Oh, that's too bad. There's no way you can leave the surface alive?

Firkon: Not without endangering our ships or others we work with. It's best to just dissolve our body. We have pills we carry to do this easily.

Me: So it's pretty high stakes.

Firkon: Earth is high stakes right now, Sharon.

Me: Yes, true. We're staring more war in the face. Oh joy!

Firkon: Not to worry. You're on a rocky path, but it will smooth out.

Me: Okay, this is the type of work that you're doing.... I've also heard of some people who open their homes to you, and I would be interested in this as well, hint hint, where alien computers and instrumentation are set up for various purposes. I'd love to help out in any way possible, so when I get my place, I'm game.

Firkon: Thank you. We do approach our own – starseeds in other words, to house us in their homes and to enable our computer systems. What we use them for are for many reasons, that of spying, or also sampling the atmosphere. For example let's say in one part of the western U.S.A. we sampled the air after a spray of chemtrails and then we monitor the effect this had on the people in the covered area. That way we can neutralize the effects on the people by using our technology to send out frequencies to help them.

Me: Oh, that's great. Yes, I've had people asking about, "What are those aliens doing about the chemtrailing?" and this should help to answer that question. Also there's the fact that the DS no longer has enough money to support their chemtrailing programs so they're slowing down. I just asked them a rhetorical question: What are you doing about chemtrailing?

Firkon: Yes. This is true.

Me: One thing I love about ETs is they never pass judgment. That way I can always tell I'm talking to an ET and not some reptilian switchboard operator or as Ashtar, I think, called them "a replicant". You guys never judge.

Firkon: There's no need to. Judgment keeps you stuck in your own opinion. We deal with facts, we deal with the truth.

Me: I'm sitting here thinking about these nefarious cretans chemtrailing people, never mind the cretans that are flying the planes! And you don't react that way at all.

Firkon: No, there's no point. We deal in facts.

Me: Yes, I can be emotional.

Firkon: That's okay. Ivo loves that about you too.

Me: LOL Yes, I'm a Scorpion.

Firkon: Besides, judgment is divisive. Extraterrestrials are of unity consciousness, as am I, of course.

Me: Don't you feel different here on earth?

Firkon: I just smile.

Me: You're so sweet. I'll bet women always try to hook up with you. LOL

Firkon: There have been a few along the way. Some of ours, some were earthlings.... LOL

Me: I'll bet the earthlings wondered when you always seemed to know what they were thinking. LOL

Firkon: I know you love flowers so were I to visit you I would bring you some.

Martian "Firkon"  
as named by George Adamski

sharonandivo.weebly.com

Me: Ah! However I'm less happy about cut flowers. I don't like cutting life down. Let it grow.

Firkon: So a potted plant.

Me: Yes, just not a pot plant. I don't do that.

Firkon: LOL

Me: I'm sure there's more you're doing than sampling the air, gaining information and spying on certain people on earth with your computers.

Firkon: There is. We also use them to help awaken earthlings.

Me: Oh yes, that too. Sending out frequencies to help wake people up. I think Sol do Naro would talk about that as well.

Firkon: That is a big part of it. The frequencies that come from the moon as well as the efforts made upon earth to reverse polarities of the incoming frequencies reduced the effectiveness of our efforts. So efforts had to be made within the veiled area that you live in, as well as efforts had to be made to affect the earth grids, so we came to the surface to do this work.

As far as mind control goes, it's been a constant battle of seeing what they have updated in their frequencies and then reconfiguring ours to block out their amendments. This is a large part of why so many people have woken up, particularly after 9/11. This was an enormous lie they told the people of earth and the mind control was structured to control people into continuing to believe this lie, but we had to fight it and we have won in so many ways. With incoming energies working along with our own, we have been very successful.

Also the polarity reversals in the churches, monasteries, etc. we have dealt with. We have technology for that that is either placed on site or nearby.

Me: What about Notre Dame?

Firkon: That was a target of theirs and we had to destroy it so that they could not resurrect the anti-Christ there.

Me: Why Paris? What's there, I wonder....

Firkon: It's a high energy portal that's there. There's the Vatican, Notre Dame is next in line.

Me: Yeah, looks like it's on a ley line going to Glastonbury.

I still feel there's something else you're doing, though.

Firkon: We can interfere with their minds just like they do with yours.

Me: Maybe that's why JB is a walking comic?

Firkon: For example, yes. We are strong telepaths and when we connect our energy to our crystalline computer systems, nobody can withstand it. They can't resist our influence on their minds.

Me: That's interesting. So this is mind control warfare going on as well as so many other things?

Firkon: Yes.

Me: Presumably when you partner up with a partner, or do you ever work alone?

Firkon: No, not really. When I'm the inside man inside a company, I have an outside man working along with me.

Me: Yes, a good precaution.

Firkon: Indeed. Two great minds are better than one.

Me: You're going to be taking all our idiomatic speech and sayings back with you to Mars. LOL

Firkon: Earthlings are entertaining.

Me: He's not being derogatory, folks. He really does love us and a being of love will always see the good in others before anything else.

Martian "Firkon"  
as named by George Adamski

Firkon: Yes. You had a question.

Me: You're working in tandem with another person all the time. That makes sense. An inside man and an outside man, or woman or women. Doesn't matter.

I just got an intuition – are your beautiful Vegan women working the social circuit .....

Firkon: As escorts? Yes, they do. They often accompany rich men to galas and these are wonderful opportunities to spy on them.

Me: Ugh! Escorts!

Firkon: Well, like you say, we came to earth to infiltrate all of your vehicles, and the escort service is a wonderful way for a beautiful Venusian telepath to garner information. These people always think about "the next thing," we've found, so if we can find occasion for them to want to entertain a female escort at a gala just as they're working on their new project....

Me: Yes. To rape humanity with...

Firkon: Yes, then we can get details and well, as you say, "Cut them off at the pass." Believe me, Sharon, it would have been a lot worse if we weren't intervening. And it would have happened long ago, not just now.

Me: I can believe that. Because that book was titled, "1984".

I also intuited you work with starseeds on the planet in terms of helping them with their innovations on earth, whether they be self employed or working in a particular field. So if a doctor is working on new herbals, then you either telepathically help them or you physically assist them or partner with them. They may or may not be aware of who you are.

Firkon: Yes, that's true, Sharon. We do this as well.

Me: How many are you around the world?

Firkon: The Venusian Alliance, which is what we are, yes they were the instigators of this alliance to help planet earth, figures in the thousands now. Perhaps ten's of thousands around and upon earth. It's not the size of the GFL but we have our own system worked out, but we definitely cooperate with all other alliances in, on and above the planet.

Me: Makes sense. Yes, there seem to be many Venusians, Martians and Saturnians involved right on the planet. The ones I don't see are the Mercurians.

Firkon: They're not really part of our Alliance. They have their own priorities and although they'll counsel with us, they do their own thing, so to speak.

Me: I know a couple who want to write a book with me!

Firkon: Do it.

Me: When I get time, Firkon, when I get time. Speaking of which, can you use your computers to clone me a few times over?

Firkon: LOL There are enough clones on this planet, Sharon. Believe me.

Me: Yes, Hollywood is all clones of each other.

Firkon: Oh there are more. Look in the public. Check out your neighbours.

Me: I know there's a woman in Toronto who people say looks just like me.

Firkon: For example. This is very common. Look on the internet. How many doppelgangers do you see?

Me: Lots of them. I know. Also, do you help restructure the planetary fields in any way?

Firkon: Yes, our computers can help with this. They can utilize the energy of the people on the planet to help restructure fields where they're weak. If they fields are weak in any particular area, we can bolster them with our computers.

IMPLANT COMMUNICATIONS  
sharonandivo.weebly.com

Martian "Firkon"  
as named by George Adamski

Me: What would happen if the field were weak?

Firkon: It would affect the atmosphere but also the people would be affected emotionally in that area as well.

Me: They probably do try to change the fields in order to affect people!

Firkon: They do, and we can affect them in turn.

Me: Now, this seems like a game of cat and mouse here. Is there anything you can do as an initiative, not as a remedy for their attacks on us?

Firkon: Ah, yes, that I can't tell you. But there is a program in place. Of course. I can't give you details of that, though. Only details that the DS would know.

Me: A good precaution. Well, Firkon, thank you for your time. Maybe we'll see each other before you leave earth, which as I understand it is due soon.

Firkon: I hope to. It depends on whether you move or not because right now you're in a bad space.

Me: Yes.

Firkon: You're there anchoring light against the negativity of the sector. We try to stay away from very negative sectors on the planet because we're affected by it as well. We prefer to go to areas of higher frequency simply because we are. For that reason, we tend to avoid cities.

Me: Makes sense. I totally can see that.

Firkon: With cities, we're in and out as much as possible. We try not to lodge there for any period of time.

Me: Yes, makes sense. Well, I'm tired now and I have to lie down, so I thank you for your time and your knowledge, Firkon.

Firkon: As God be with us.
