

ET Profile

Name:	Gladelia
Race:	Alpha Centauri
Home Planet /Star:	Meton, Proxima Centauri
Dimension:	4th
Distance from Earth:	4 light years
Calling:	Retired starseed
Service to Earth:	Introduction to Alpha Centaurians, provide information to earthlings
Earth Incarnations:	Elizabeth Klarer
Books:	"Beyond the Light Barrier" - by Elizabeth Klarer
Videos:

Biographical Information:

Me: I'd like to introduce Gladelia of Alpha Centauri, who is Akon's mate. In the book, "From Beyond this World," Gladelia describes her life as a lightworker on earth, born on Venus, and moved to earth to become the child of a South African farm couple, the mother being from England. As Elizabeth Klarer of earth, she was foretold by her Zulu houseman Ladam, that the sky gods would come back to meet with her in future as she was to be a link between earthlings and the sky people.

In this beautifully written book, Elizabeth describes her UFO sightings in detail until the day came when Akon finally landed in the Drakensburg mountains in the 1950's, they fell in love (because they were always in love and like Ivo and I, have been for millions of years) and they had a child named Ayling, who was raised an Alpha Centaurian.

Having left this earth in 1994, she is now back on Meton with Akon and Ayling, and we're now going to catch up with her to see what she is doing and if she has any messages to pass on to us on earth.

Hello, Gladelia!

G: Well, I must say, I will speak to you in the same accent that you are familiar with from earth. As for messages I would love to pass on this one, "Stop your fighting!" Yes, it is such a relief to be back on Meton where life is peaceful again.

Me: I think this is important for people like me and other lightworkers who are leaving to go home in this lifetime. What you have to say may prepare us for that transition.

G: Well, I'm not like you. I was not put in stasis as your Vegan body is. I actually died and was reborn on Meton, grew up to adulthood where I was mated with Akon again. So our stories are a bit different in that respect.

Me: Yes. Well, I'm sure there are similarities. What happened when you died?

G: Ah! Yes. I died of cancer at 84 and simply went back to Meton in spirit of course. I was still Elizabeth and had to transfer over to another body which was in the process of incubating. Yes, my mother was pregnant with me as I died on earth. So I simply switched consciousnesses

Me: What happened to Elizabeth?

G: She is me. She didn't die. I just took another body.

Me: That always confuses me.

G: Well don't worry, you won't have to do it.

Me: I do. My other body is in a coma.

G: Not to worry, Ivo will help you then!

Me: He will. He'll be there when I transition. So did you have to go through this big hall and see your life flash before your eyes?

G: No, not really because my life was for a specific purpose and I fulfilled that purpose. It wasn't so much for improvement of my soul that I was there. At a higher level, my soul was learning but I won't have to go through this process of assessing myself until this life is done as this life is still part of that process.

Me: A bit different. Oh I see, you had to have the life experience on earth to be able to go forward now on Meton. So now you're channeling me. Aha!

IMPLANT COMMUNICATIONS

G: Yes, the work involves many lifetimes. Your information about reincarnation is gained from your limited standpoint.

Me: I get the feeling, though, that I have to pass a bunch of tests in order to "graduate" from earth and so somebody must be marking my test papers.

G: You will be. Your soul.

Me: So I don't have to meet with ascended masters or anything.

G: You speak to them. You are one of them, so no.

Me: So it's different for lightworkers. You can't pass the test on something you've already done in a prior life.

G: Yes, it's something like that.

Me: Well, let's get to some more background information. You went back to Meton to be born again as Gladelia, and Akon of course knew who you were, and now you have a son who's older than you are.

G: (laughing) We get used to these things. We bear children in different bodies but we relate to the soul, not the physical body. Yes, another earth problem. You think you are your bodies. Forget your bodies. Relate to each other completely at a soul level and you'll understand why it's alright to have a son that's older than you are. It's the soul who delivers the child, not the physical body. And it's the soul who is considered with the conception of the child. Not the physical mind or personality. When you think this way, it will make more sense to you..

Me: So, Akon is much older than you are. What if he dies and you're left without a mate?

G: He'll last a while, I'm not worried. LOL He will pass on well before I will, but that's fine. I can take another mate if I want or simply just be with him in spirit. We see them so it's not a problem. We can still even exchange energies and be intimate.

Me: So that's why you always choose the right mate, otherwise you're stuck with the mistake you made for the rest of your days.

G: Yes, earth is such a system for finding a mate. It's such guesswork.

Me: Well, you attract who you need.

G: You do, but you can attract many mates for many reasons. The road to enlightenment has many roads. Which do you plan to take today?

Me: I see. Well, at least you have choices.

G: It's just not as simple as even explained by spiritualists on earth. They explain it as if it were easy but there's a complicated process behind all choices you make. A lot has to do with what's been accomplished in the higher dimensions and that filters down to aid you in the third dimension.

Me: Oh, we're fourth now. Don't gyp us! LOL

G: Well, yes, you've moved up somewhat. And I see the corruption is being addressed on earth, one of my pet peeves. Oh my! A corrupt place indeed!

Me: It's hard living here with these energies.

G: I was fortunate because I was in the fresh mountains of South Africa. I was away from the apartheid problem and somewhat isolated. So I was aware of Akon's presence earlier in my life than your Ivo.

Me: Ivo was there but he didn't introduce himself. I knew he was a guide and I spoke to him a lot but I never asked his name. In fact, I thought he was my last earth guide, Margaret. LOL

G: He didn't care as long as you spoke to him.

Me: So most likely you lived there because it made your relationship with him more apparent.

G: Yes, that was my primary purpose.

IMPLANT COMMUNICATIONS

Me: I've always wanted to ask you. How in the name of God did you ever get the guts to leave your baby behind on Meton and Akon too, after being so close to him for what would've been years on Meton but only months on earth. (Owing to its faster frequency, time goes quicker on Meton.)

G: It wasn't easy!

Me: I thought you were very brave. Leaving your boy behind, even agreeing to do that in the first place.

G: I knew that he'd have a better upbringing with Akon and he was chosen by them to help in their genetics.

Me: As far as genetics goes, you're from Venus, not earth, so your genetics are Venusian, not Terran.

G: Yes, I was brought here to become an earth child. It would have been more straightforward to meet with Akon on Venus and have the child on Meton than to do it this way, but I was on earth for another reason. They were after the genetics of the Venusians, not earth genetics. I was put on earth to help with the Terran question. There are other Venusians on earth, as you know. They are there to enlighten your people. As you know the Alpha Centaurians are descended of Venusians so when they wish to strengthen or change their DNA, they get Venusian DNA. There is Alpha Centaurian DNA on earth as well and it can be done this way as well but since earthlings have such mixed DNA as it is, you're considered more of a humanoid than a human race.

Me: I know. We are part reptilian, really.

G: And more! Annunaki, there is grey DNA and it is becoming more mixed in as we speak. There are more and more hybrids on your planet than a true human.

Me: So you came here, and either were adopted by an earth couple or they were mind swiped into believing you were their child and they'd actually conceived you. Good thing they didn't have very advanced DNA analysis at that time because they could've figured out you weren't their child.

G: (laughing) Yes, they can create new timelines based on things like this and they did.

Me: I just don't know the right word for it. It's not mindswiped more like they created the reality and put it into their heads.

G: Your genetic analysis has fallen behind what it should have been as with many of your technologies. When your scientists begin to discern what's in the 3 per cent they don't know and what this "junk DNA" actually is, they will be astounded. Then they can no longer deny the existence of alien life nor can they deny it's been on earth. (laughing)

Me: I'm sure some of them know but they're in the dark projects.

G: Yes. Your earth will undergo a severe change within the next couple of years. The public opinion will become insistent on the truth being spoken. No more lies will be tolerated. They will realize, as the stories of child molestation and satanism come out, that they have been tricked, and will insist on the truth. Many will not be able to believe anything they're told and there will be some anarchy as people revolt against the governments. It will be difficult for a while.

Me: That's how we do change, Gladelia. We're an imbalanced planet and we will change in an imbalanced way. The lower timelines will be especially affected.

I've heard everyone will ascend all at once and many will go to 5D but as for the ones who refuse to change, it's going to be tough.

G: It will. They'll be put on other planets eventually where they will be able to ascend under less stressful circumstances.

Me: It'll be interesting. We'll leave it there for now, thank you for speaking with me.

G: You're most welcome. I have much more to tell you.

Me: We'll speak again Gladelia.
