

ET Profile

Name:	Lerak
Race:	Andromedan
Home Planet /Star:	Baleris, Star 44
Dimension:	5th
Distance from Earth:	32 light years
Calling:	Ashtar Command Mothership Commander
Service to Earth:	Liberation of Planet Earth
Earth Incarnations:	None
Books:	None
Videos:	None

Biographical Information:

The Andromedans, who are not originally from this galaxy but from the Andromedan galaxy, live in a constellation named after them. Originally calling Lyra their home, they moved out of that system when the Draconians attacked. This was approximately 1 million years ago.

On the run, the Andromedans hid out in hollowed out asteroids when beings from the Casseopian system helped them out.

In the constellation of Andromeda there are 2 main stars, Star 42 and Star 44, the former surrounded by 27 planets and the latter by 7 planets. Some of the Andromedan planets are water planets.

The Andromedans have their own council, The Andromedan Council, which has membership in both the Andromedan and Milky Way galaxy's systems, as well as being members of the Galactic Federation. They are close to friends in the Tau Ceti and Cygnus Alpha system.

The Andromedans are using beams to clear out negative aliens from the underground bases around our world; they have been particularly active in the east coast of the United States. - Source Alex Collier, Contactee.

Lerak considers himself humanoid of an aquatic variety. He says he's a Caskiopod who comes from one of the 5 aquatic planets surrounding Star 44 named Baleris, the other 2 planets being primarily land. He has webbed hands and feet, as well as gill which allow him to breathe under water. Lerak has a jovial personality and has a good sense of humour, which he considers important while traversing the fourth dimension.

He enjoys swimming, eating earth food, debating, and he plays a sport similar to tennis but it would be underwater. I am mated, he says, to Alena and he has 1 child, a male. He says his family has worked with the Federation so he joined it rather than working in other Andromedan fleets around earth.
