

ET Profile

Name:	Sharina
Race:	Telosian (Agarthan)
Home Planet/Star:	Earth
Dimension:	5th
Distance from Earth:	N/A
Calling:	Mystic
Service to Earth:	Inner Earth Council
Earth Incarnations:	many

Biographical Information

Me: Hi Sharina, How are you?

Sharina: I'm seeing that you're getting ready to open your own space port.

Me: I am. Cool, eh?

Sharina: It will happen soon, before June this year.

Me: Good. Ivo has tried to keep moving this forward but it keeps getting set back. There are always things in the way. We'll have a connection to the Agarthan underground, so you can stop by if you like.

Sharina: I'd love to.

Me: But if you show up, we'll put you on TV. I'm going to arrange to have several interviewers because I plan on being busy.

Sharina: That's great. So much information to share.

Me: I plunged right into channeling your work a while ago, but then when my friend insisted I channel Adama, I switched away. But I want to involve you in the project about solar councils because I realize you sit on the council for Telos.

Sharina: I do. There are other councillors as well, and Adama is the head councillor, of course.

The councillors are always there to help others in their ascension. Councillors tend to be masters who embody in order to help others to ascend.

Me: Yes. We have the masters for outer earth but it stands to reason the Lemurians had their masters as well.

Sharina: We're working out how we're going to be of assistance to outer earth as well. As soon as you begin to ascend again, the solar system will move up as well.

Me: I know. I think we've been the hold-up, through no fault of our own.

Sharina: We have people already on the surface who are helping to get out information and to teach. Sharula Dux would be one of them, actually living with an outer man on the surface.

We correspond with her and aid her in her work. There are others on other continents. Africa also has a large instance of Telosians, and others from the inner cities working there as well.

Education is the primary objective. We produce the information so that you can make up your mind whether to accept or to reject it as your own truth.

Me: Yep. Free will. Choose your timeline accordingly. We're going through that now with our politics.

Sharina: Yes, finally, the Annunaki will be dealt with. This is an effort that has taken the entirety of cosmos to do.

Me: I believe it. Yet in the end, the final decision is up to us: what do we want to believe or not.

Sharina: It is. And those who refuse to believe the truth will incarnate elsewhere and acclimate to other third dimensional planets where they can take their time in opening up to the truth.

Earth is past due. It's time for her to ascend.

Me: Thank you, Sharina. I'll be speaking to you more on the solar and planetary council information I'm looking for.

Sharina: Very well. We'll speak again. I leave you with love in my heart for all.
