The Importance of Understanding Universal Law

~ Sharon Stewart

This is one of the universal laws. As I said in the other post today, when you live by universal law or natural law, you live according to the laws of creation and creation is love.

Your life becomes easier. You stop having so many problems and you start to create the life you want. Your stress level goes down.

Why? Because without knowledge of universal law, you are unwittingly going against the current. When you don't comply with universal law you don't get the results you want.

Worse, you will be fated to repeat the mistakes you're making until your higher self can get you to the point that you're living in compliance - and that's in every area of your life. Think about it. Help him or her out and work with them not against them.

Ivo and I have written a book about Universal Laws, the basic ones.
